The ISO 31000 Advantage

CHAPTER ONE

— What's in it for you?

The ISO 31000 Advantage

In today's uncertain and complex world, organisations face constant change, increasing expectations from stakeholders, and growing pressure to deliver sustainable results. Success is no longer defined only by efficiency or profit — it also requires resilience, adaptability, and the ability to make sound decisions in the face of uncertainty.

This is where **ISO 31000, the international standard for risk management**, provides a clear advantage. Far more than a compliance exercise, ISO 31000 is a **principle-based framework** that helps organisations create and protect value. It integrates risk management directly into decision-making at all levels — from strategic planning to daily operations — ensuring that uncertainty is addressed in a structured and consistent way.

By applying ISO 31000, organisations can:

- **Align risk with objectives** to ensure decisions are purposeful and value-driven.
- **Strengthen governance** by embedding accountability and transparency into leadership.
- **Improve resilience** by identifying vulnerabilities and opportunities early, before they escalate.
- **Foster continuous improvement** by learning from experience and adapting to change.

For individuals, mastering ISO 31000 means more than gaining technical knowledge. It means speaking a **common international language of risk**, recognised across industries and borders. It **empowers professionals** to contribute with confidence, whether advising management, auditing systems, leading teams, or guiding clients.

The overarching advantage of ISO 31000 lies in its universality: it can be applied to any organisation, of any size, in any sector. Whether you are leading a global enterprise, advising a client, or managing a project, ISO 31000 provides the tools and principles to make better decisions, balance risk and reward, and achieve lasting excellence.

Your Learning Path

CHAPTER TWO

What's our offer for you?

Your Learning Path

Learning ISO 31000 is not a one-time event — it is a journey. To truly benefit from this international standard, participants move step by step: first gaining a **solid foundation**, then advancing towards the **implementation level** where frameworks are designed, integrated, and continuously improved.

Our courses are designed to guide you along a path, ensuring each stage prepares you for the next:

CRMF® — Foundations (Entry Level)

The **ideal starting point** for those new to ISO 31000 or for professionals seeking a recognised **entry-level certification**. This course provides the **essential building blocks**: the terminology, principles, framework, and process of ISO 31000. By completing the **CRMF® certification**, participants gain the confidence to recognise risks as the *effect of uncertainty on objectives* and to apply structured methods for identification, analysis, and evaluation.

CRMIP® — Implementation (Advanced Level)

The next step in the journey is **mastering the design and integration of risk management** within an organisation. This advanced programme equips participants to move beyond understanding and into practice: building frameworks, setting risk criteria, planning treatments, establishing monitoring and review, and **developing a culture of continuous improvement**. Completion of the CRMF® is recommended as preparation. Successful candidates earn the **prestigious CRMIP® certification**, marking them as professionals capable of embedding ISO 31000 into decision-making and governance.

Together, these two certifications form a **clear and inspiring progression**. Whether your ambition is to strengthen your personal expertise, to advise clients as a consultant, or to embed resilience within your organisation, **the learning path from CRMF® to CRMIP® offers a structured way forward**. Step by step, you advance from understanding the essentials to leading implementation and creating sustainable impact.

Courses at a Glance

CHAPTER THREE

— a complete learning journey in ISO 31000.

CRMF® – Foundations (Entry Level)

Purpose:

Build a **strong foundation** in ISO 31000.

What you learn:

- **Key vocabulary**, definitions, and concepts from ISO 31000 and ISO 31073.
- **The principles** of ISO 31000 and why they matter.
- **The framework**: leadership commitment, integration, design, implementation, evaluation, and improvement.
- **The process**: Communication, scope, context, assessment, treatment, monitoring and feedback.

Outcome:

- A **clear understanding** of how risk links to objectives.
- The **ability to describe risks** in structured terms (risk sources, events, consequences).
- The ability to **take better decisions**.
- Preparedness for the **GNIC® CRMF®** certification exam.

Ideal for:

Professionals new to ISO 31000, or anyone needing a recognised entry-level certification to support their career.

CRMIP® – Implementation (Advanced Level)

Purpose:

Move **beyond knowledge** to designing and embedding ISO 31000 in your organisation.

What you learn:

- How to **translate ISO 31000 principles into behaviours** and competencies.
- How to **design and integrate a risk management** framework into governance and operations.
- How to **develop** risk criteria, treatment plans, and an **approved communication approach**.
- How to monitor, review, and **continuously improve** risk management performance and **performance of the organisation**.

Outcome:

- The ability to **implement ISO 31000** systematically within an organisation.
- Confidence to **align risk management with strategy and decision-making**.
- Recognition as a Certified Risk Management Implementation Professional (**CRMIP®**).

Ideal for:

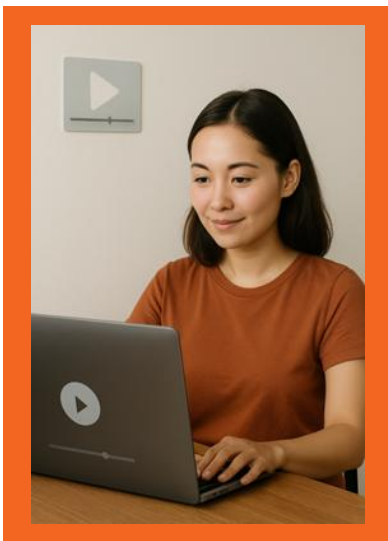

Managers, consultants, auditors, and professionals aiming to lead risk management implementation and strengthen organisational resilience

Delivery Formats 1/2

CHAPTER FOUR

— Learning tailored to your needs.

We understand that professionals and organisations have different needs, schedules, and learning preferences. That's why our ISO 31000 training is offered in multiple formats — from flexible online learning to immersive residential courses. Each format delivers the same high-quality content and internationally recognised certification.

Self-Paced Video (CRMF – preparation)

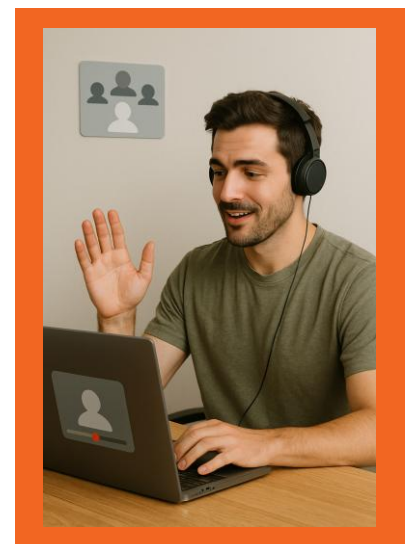

Learn at your own pace, anywhere in the world.

- *A series of short, engaging video modules covering the ISO 31000 foundations.*
- *Includes study materials, knowledge checks, and exam access.*
- *Participants can complete the course in their own time, with a deadline for the certification exam.*
- *Online support and optional monthly Q&A sessions ensure no one is left behind.*

Live Online Sessions

Interactive training, accessible remotely.

- *Delivered via Zoom/Teams in real time with your trainer.*
- *Combines presentations, group discussions, and case-based exercises.*
- *Ideal for those who value live interaction but prefer to avoid travel.*
- *Includes full exam access and certification.*

Delivery Formats 2/2

CHAPTER FOUR

— Learning tailored to your needs.

Classroom training brings learning to life. Being together in the same room fosters richer discussions, immediate feedback, and a stronger sense of shared purpose. Residential formats take this even further: they create a unique environment for networking, informal conversations, and cross-pollination of ideas between professionals from different sectors and backgrounds. The result is not just knowledge transfer, but lasting connections and insights that extend well beyond the course itself..

Residential Classroom (3 or 5 Days)

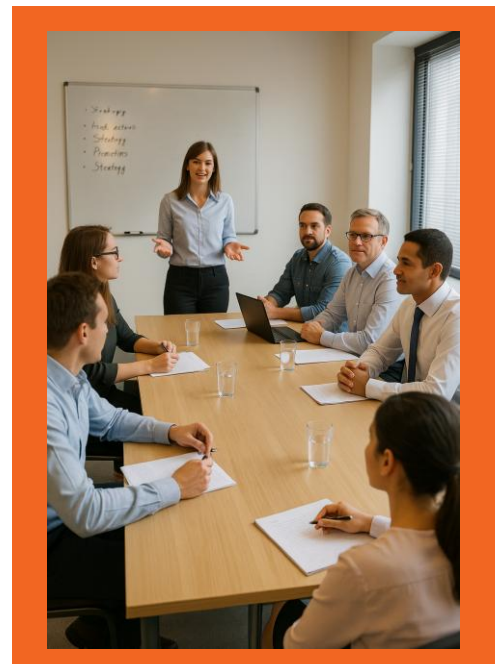

Immersive learning in a professional setting.

- *Intensive in-person courses held in 4-star hotels in the centre of Brussels.*
- *3 days for CRMF (Foundations), 5 days for CRMIP (Implementation).*
- *Includes catering, course materials, networking opportunities, and exam.*
- *Best suited for participants who value face-to-face interaction and peer learning.*

In-Company Programmes

Customised to your organisation's context.

- *Tailored training sessions delivered on-site or virtually for teams.*
- *Adapted to your industry, structure, and objectives.*
- *Available in English, Dutch, or French.*
- *Flexible scheduling and optional integration with consulting or coaching.*

Who Should Attend

CHAPTER FIVE

— Our courses are designed for professionals across industries and functions.

ISO 31000 is universal — its principles and methods apply to every organisation, regardless of size, sector, or geography. That's why our courses attract a wide range of participants, from executives to project managers, each gaining specific benefits from mastering this standard.

Managers and Leaders

Align strategy, governance, and resilience

Executives, directors, and senior managers will learn how to connect risk management directly with strategic objectives. They gain tools to strengthen governance, improve decision-making, and foster a culture of resilience and continuous improvement.

Risk and HSE Professionals

Enhance processes that protect people, assets, and value

Health, safety, environment, and risk professionals will deepen their expertise with ISO 31000, gaining structured methods to identify, analyse, and treat risks. They return with practical tools to improve organisational performance while protecting people and resources.

Internal and External Auditors

Strengthen assurance with a global framework

Auditors will learn how to apply ISO 31000 as a benchmark for evaluating organisational practices. The certification enhances their professional credibility and equips them to deliver more comprehensive, risk-based audits aligned with international standards.

Consultants

Expand your expertise and service offering

Consultants advising clients in governance, risk, compliance, or management systems will gain advanced ISO 31000 knowledge and a recognised certification. This strengthens their market position and enables them to guide clients with a structured, internationally validated approach.

Project and Programme Owners

Embed risk management into delivery and change

Leaders of complex projects and change initiatives will discover how to anticipate uncertainty, set clear risk criteria, and integrate risk management into planning and execution. The result: higher success rates, better stakeholder alignment, and more predictable outcomes.

Those New to ISO 31000

Start with a solid foundation

For participants with limited prior exposure, the CRMF® Foundations course provides the essential knowledge and vocabulary to get started. This entry-level certification builds confidence and prepares you to advance towards the CRMIP® Implementation programme.

What You Will Learn CHAPTER SIX

— From concepts to practice, from understanding to application

Our ISO 31000 certification programmes are designed to provide more than knowledge. They help participants **build confidence, develop practical skills, and apply risk management as a driver of better decisions and sustainable value.**

Regardless of which level you join, you will be exposed to the principles, framework, and process of ISO 31000, and learn how to embed them into real organisational contexts.

CRMF® – Foundations (Entry Level)

- **Understand risk** as the effect of uncertainty on objectives.
- **Learn the vocabulary** and definitions of ISO 31000 and ISO 31073.
- **Explore the 8 principles** of risk management and why they matter.
- **Discover the ISO 31000 framework** and the role of leadership and commitment.
- **Practice the risk management process:** Communication & consultation, scope, context & criteria, identification, analysis, evaluation, treatment, monitoring and feedback.
- **Prepare for the GNIC® CRMF® certification exam.**

CRMIP® – Implementation (Advanced Level)

- **Translate ISO 31000 principles** into competencies and behaviours.
- **Design and integrate** a risk management framework tailored to your organisation.
- **Develop and apply** risk criteria for structured decision-making.
- **Build and implement** treatment plans aligned with objectives.
- **Establish effective communication** and consultation with stakeholders.
- **Evaluate and improve** performance to embed continuous learning.
- **Prepare for the GNIC® CRMIP® certification exam**, validating your expertise as an implementation professional.

Shared Learning Outcomes

Whether at the foundational or advanced level, participants leave with the ability to:

- Apply ISO 31000 as a **practical, principle-based framework**.
- Contribute to **informed and transparent decision-making**.
- Strengthen **organisational resilience and performance** through structured risk management.
- Use a **shared language of risk** that bridges roles, functions, and industries.

Together, CRMF® and CRMIP® provide a **progressive path**: from mastering the essentials to leading implementation and continuous improvement.

CHAPTER SEVEN

What is included in this course - CRMF

Everything you need to succeed

Specific CRMF:

- A notes version of the training slides in PDF, with space for personal reflections.
- Access to study guides and video materials (for self-paced participants)..
- Participation in exercises and knowledge checks to reinforce learning.
- Full access to the GNIC® CRMF® exam via a secure online platform.
- Upon passing, the Certified Risk Management Foundations (CRMF®) certificate.

Shared Value for All Participants

- GNIC® certification, recognised internationally and supported by an independent non-profit organisation.
- Certificates of participation and CPE credits to support professional recognition.
- Professional support and online resources to help you transfer learning into practice.
- Training delivered in 4-star venues for residential programmes, ensuring comfort and a productive learning environment.

YOUR **TRAINER / COACH** Peter Blokland, PhD

Peter Blokland, founder of BYAZ bv and Chairman of GNIC® npo, is a seasoned professional with a background in Military and Aeronautical Sciences. He completed a career as an F-16 Fighter pilot, Flying Training Instructor, Commanding Officer, Staff Officer, and Aviation Accident Investigator.

Post-military career, he honed his expertise through coaching and training courses, delving into Leadership, Systems Thinking, Risk Management, and Continuous Improvement.

His insights are encapsulated in the books **"Total Respect Management"** (2013) and **"Safety & Performance"** (2017). Additionally, he holds a Ph.D. from TU Delft, with his thesis: **"Towards Sustainable Safety & Performance in Organisations"**.

Peter is an **ISO 31000 expert for NBN**, the Belgian National Standardization body, and as a member of ISO TC262's Belgian shadow committee (**I262**), Peter is directly involved in ISO standards and brings a wealth of knowledge to the field.

CHAPTER SEVEN

What is included in this course - CRMIP

Everything you need to succeed

Specific CRMIP:

- A personal copy of the handbook "Implementing ISO 31000 & Managing Risk in Organisations" (300+ pages).
- A personal copy of the ISO 31000 standard and the ISO 31073 vocabulary guide.
- A notes book version of the training presentation in PDF.
- Access to course-related videos and case materials. Full catering during the 5-day residential training.
- Access to the GNIC® CRMIP® exam and certification upon passing.
- 3 hours of post-course online coaching to support the design of your own framework, plan, and communication approach.

Shared Value for All Participants

- GNIC® certification, recognised internationally and supported by an independent non-profit organisation.
- Certificates of participation and CPE credits to support professional recognition.
- Professional support and online resources to help you transfer learning into practice.
- Training delivered in 4-star venues for residential programmes, ensuring comfort and a productive learning environment.

Practical Information

CHAPTER EIGHT

— Designed for international professionals

Our Training Programmes

Our programmes are organised **to make participation as smooth and effective as possible**. From language and venues to scheduling and certification, every detail is aimed at ensuring a professional, accessible, and enriching experience..

Our courses are designed to guide you along a path, ensuring each stage prepares you for the next:

Language of Instruction

- All open-enrolment courses and certifications are conducted in **English**, ensuring global recognition and accessibility.
- In-house programmes can also be delivered in **Dutch or French**, tailored to the needs of your organisation.

Venues

- Residential courses are hosted in carefully **selected 4-star hotels in Brussels**, located directly next to Central Station in the **city centre** with a 20-minute train connection to Zaventem International Airport.
- Venues provide modern training facilities, comfortable learning environments, and full catering throughout the course.

Duration

- **CRMF®** Foundations: **3 days** (residential) **or** flexible options via **self-paced video** and live online sessions.
- **CRMIP®** Implementation: **5 days** (residential), with **3 hours** of personalised post-course coaching included.

Scheduling

- Courses are **planned 6–9 months in advance** to support international travel arrangements.
- Upcoming **dates and locations** are published **on our registration page**.
- In-company training can be **scheduled at mutually agreed times**.

Certification

- Examinations are delivered via a **secure online platform**.
- Participants who meet the requirements receive the **official GNIC® certificate, authenticated and recognised internationally**.
- Certificates are issued in **digital format**, with **hard copies mailed** by secured post.

How to Register

CHAPTER NINE

— Your next step towards international certification

Joining our ISO 31000 certification programmes is simple. Whether you want to strengthen your own expertise or develop capabilities across your organisation, we provide clear registration options.

For Individual Participants

- ✓ Select the course that matches your ambition: CRMF® (Foundations) or CRMIP® (Implementation).
- ✓ Choose your preferred format: self-paced video, live online, or residential classroom.
- ✓ Register online via our secure platform.
- ✓ Receive confirmation, course materials, and exam instructions.

For Organisations

- ✓ Contact us to discuss in-company training for teams or departments.
- ✓ Programmes can be tailored in scope, language (English, Dutch, French), and schedule.
- ✓ Corporate packages and group rates are available on request.

Support Along the Way

- ✓ Our team will guide you through the registration process.
- ✓ We provide clear pre-course information, support with travel arrangements (for residential courses), and assistance with exam logistics.

Take the Next Step

ISO 31000 offers a proven pathway to creating and protecting value in uncertain times. With GNIC® certification, you gain international recognition and practical tools to make a difference in your organisation.

✚ **Register today** to secure your place and take the next step in your professional journey.
